

# Resilient Floor Underlayment

No seam telegraphing. No core voids.  
Unmatched price & performance!

Enstron Underlayment is the most environmentally friendly underlayment with 100% certified recycled fibre, formaldehyde free construction & 15 year warranty. Claim rate over its 20 year history is .001%

## WHY CHOOSE ENSTRON

### No core voids

Enstron has no core voids, delamination, or hidden imperfections. It eliminates call backs because of underlayment failures.

### Smooth surface

Sanded at 100 grit, to a tolerance +/-0.005. This reduces the need to patch and sand which saves installation time.

### Surface hardness

At 46 lbs/cu. ft of density, Enstron is twice as dense as luan plywood. It deflects and reduces unexpected damage.

### Vinyl, Hardwood & More

Enstron is approved as a substrate for hardwood flooring installations. One underlayment covers a variety of underlayment needs.
